Noninfectious after 24 hours of treatment	Exclusion from school until 24 hours after medical treatment and 24 hours fever free without the use of fever reducing medication.
<b>VOMITTING</b> <i>Involuntary expulsion of gastric contents through mouth</i>	Variable	Variable	Exclusion from school until 24 hours after the last episode

### Return to school from Coronavirus:

1. Following any quarantine due to positive test results, the school must receive documentation from their physician or county health department that they are eligible to return to school
2. Employees and students are not allowed on campus if they have been exposed to someone diagnosed with covid-19 until their physician or the county health department determines they are eligible to return
3. Employees and students may return to school if they have tested negative for covid-19 and have been symptom free for 48 hours without the use of medication
4. Employees and students that are presumed to have covid-19, but have not been tested, may return to work if they have had no fever for at least 3 (72 hours) days, their symptoms are improving, and at least 10 days have passed since their symptoms first appeared.
